AFPOP8-1 – Understanding Modern Ornamental Fence Products and Applications

AIA accredited presentation – 1 hour (CEU)

SUMMARY

This presentation will provide a better understanding of modern Ornamental Fence products and their applications. All persons attending this presentation qualify for ONE HOUR of continuing education credit through the AIA program.

SYNOPSIS

When we think about modern ornamental fence applications, we think about wrought iron. Past concerns of performance and durability certainly come to mind, as well as the preconceived notion that these products cost more than traditional perimeter enclosure systems. Modern technology has changed the ornamental fence market. No longer are these products exorbitantly priced systems manufactured only by the most skilled tradesmen. Now these products are readily available, cost effective, and incorporate modern manufacturing that will provide unprecedented product performance. Recent product developments and procedures will be highlighted and discussed. The presentation will explore current product options, assembly options, and other key pieces of information that will assist your design team when making critical design decisions as they pertain to your perimeter security solutions.

The following learning objectives will be met –

- Learn the history of ornamental fence products.
- Learn the differences in material options.
- Learn the components that make up modern ornamental fence applications.
- Learn the different options for installing ornamental products.
