

SHALLOW MOUNT™

DEFENDER™ | ANTI-RAM BOLLARDS

Defender security bollards conform to the *toughest testing procedures in the industry*. Our Shallow Mount variations enable us to provide high security solutions with *installations at a fraction of the depth required of traditional security bollards*. Shallow Mount security bollards provide *free movement of pedestrians* and are available in a *variety of operating sets and formations*.

SECURITY ADVANTAGES

- *Nominal excavation depth equates to minimal site disruption, subsequently avoiding underground utilities*
- *Ease of installation allows more bollard arrays to be set in a single mobilization thus reducing project costs*
- *Flexible design allows multiple bollard array combinations to fit project application requirements*

SHALLOW MOUNT™

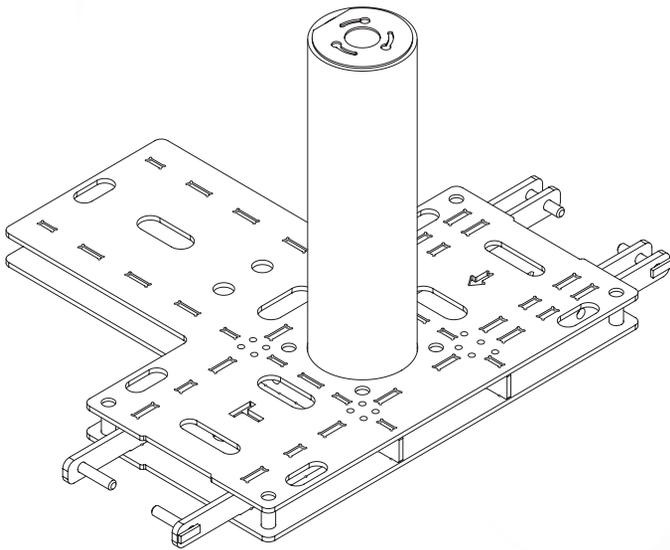

DEFENDER™ | ANTI-RAM BOLLARDS

SHALLOW MOUNT BOLLARDS

FEATURES

- ▶ *Shallow Installation Depth (8" bury depth)*
- ▶ *Powder Coat Finished Bollards*
- ▶ *Customized Painted Finish or Decorative Sleeve**
- ▶ *Reflective Banding**
